

# Mainliner

## High Rise

Nothing she can do, she's so confused  
Something should be done but she'll refuse  
    She's got a new fix to ease her pain  
    She's got a new fix to control her brain  
    Oh no, no, no, mainliner, mainliner  
    Out of frustration, she unwraps the foil  
    Takes out her spoon, starts to boil  
    She used to be pretty to all her friends  
But the hypodermic needle took her to the end  
    Oh no, no, no, mainliner, mainliner  
    She's boiling up, always in heat  
    Stick it in again, just to keep her beat  
    This time she'll try a little more  
    This time we found her on the floor  
    Oh no, no, no, mainliner, mainliner
