Gravity

Deitrick Haddon

Tryin' to make it to Heaven, stuck on the moon
How beautiful Earth is from this point of view
So much evil back on the ground
Gravity keeps on bringing me down, down, down
Yeah, oh, oh, oh
Bringin' me down
Yeah, oh
Yeah
Launcher sent to let my light shine
Like the sun that illuminates the sky so bright
Like the stars that chase away the dawn this night
Church why can't we be more like the moon that glow, let's go
Lord, I wanna to be where You are
But in my flesh, Lord, I can only go so far
It's like a test, every time I try to raise the bar
I wanna wish a free leap but there's too much gravity
Tryin' to make it to Heaven, stuck on the moon
How beautiful Earth is from this point of view
So much evil back on the ground
Gravity keeps on bringing me down
So much hatred, famine and wars
I don't wanna go back anymore
I'm gonna share with the world the peace that I found
But gravity keeps on bringing me down
Gravity keeps bringing me down
Gravity keeps bringing me down

Gravity keeps bringing me down
Gravity keeps bringing me down
If I can just find a way
From the negative energy that sunders faith
Get on a spaceship, take a trip to space
Go with me sightseeing through the Milky Way
Oh, did You make Pluto, Jupiter and Mars?
Only You can make Venus, Neptune and stars
In fact makes me feel like I can just surf in gravity
Brings me right back down to Earth
Tryin' to make it to Heaven, stuck on the moon
How beautiful Earth is from this point of view

So much evil back on the ground
Gravity keeps on bringing me down
So much hatred, famine and wars
I don't wanna go back any more
Gonna share the world the peace that I found
But gravity keeps on bringing me down
Gravity keeps bringing me down
Gravity keeps bringing me down
Gravity keeps bringing me down
Gravity keeps bringing me down
Yeah, yeah, oh, yeah, oh yeah
Oh, eh, oh, oh
