Always Remember

Valtari

Always remember I'm by your side
Such a shame that you had to go
So much more that I'd like to know
So many things you forgot
To show me how to do
When times are hard I forget you're gone
I go to call you before it dawns on me
That you won't be there now but I still
Have these words that you gave me
Always remember I'm by your side
Always remember I'm by your side
I got two kids of my own now
They grow up so fast and how I wish
You did not miss that part of who I am
But I keep doin' all that I can do
And I will smile when they ask about you
And I will sing to them every day with voice

And the words that you used to say
Will change the world one day
Always remember I'm by your side
Always remember I'm by your side
And while they grow up, you will show up
In things they do and say
Like a reflection to a connection
Of who they'll be one day
They will learn to get their wings
And fly through the changes life will bring
So on and it will go on and you will go on
And they will sing with the voice
That you gave them
Always remember I'm by your side
Always remember I'm by your side
I'm by your side, I'm by your side
