

# Before You Break My Heart

Bobby V

I just wanna love you, I just wanna love you  
I just wanna love you, I just wanna love you Walking around in circles  
Your love's got a grip on me  
There's something going on, girl I know  
You got me waiting, what's it gonna be?  
Girl I've tried to give my all  
But you're creeping out here  
Why do you got your guard up?  
I'm so sick of hearing you crying Oh, oh, oh don't cry (don't cry)  
Oh, oh, oh don't cry  
Before you break my heart, tell me  
Is there anything I can do different?  
Is there anything I can do different?  
Is there anything I should have done different? So long, we gotta elope  
Never fight, it's alright  
For so long you played along  
Acting like our future's bright  
No more bailing these days  
Such blame when you play with my heart  
No more reason to cry  
If you don't want I don't want no more Oh, oh, oh don't cry (don't cry)  
Oh, oh, oh don't cry (it's alright)  
Before you break my heart, tell me  
Is there anything I can do different?  
Is there anything I can do different?  
Is there anything I should have done different? When you play my heart, tell me  
Is there anything I can do different?  
Is there anything I can do different?  
Is there anything I should have done different? I just wanna love you, I just wanna love you  
I just wanna love you Maybe should've been a thunder  
Maybe should've understood  
Just feel this  
You never had feelings for me Oh, oh, oh don't cry (don't cry)  
Oh, oh, oh don't cry (forgive ne)  
Before you break my heart, tell me  
Is there anything I can do different?  
Is there anything I can do different?  
Is there anything I should have done different? Before you break my heart, tell me  
Is there anything I can do different?

Is there anything I can do different? Something that I can do  
Is there something that I can do?  
Just something that I can do for you I just wanna love you, I just wanna love you  
Is there something that I can do before you break my heart?
