## **Softly**

## Lonestar

I remember that kiss in a cold world, oh, girl Sunlight fell from your lips, tenderly you shattered me Somehow you touched me like no one else Slipped into my soul like a prayerBaby, with the sweetest kiss Came along and stole my breath Tore down my defenses with a whisperOh, you showed me how love can be You broke through to my heart Softly, baby, softly You're like God in this world, fragile, beautiful There's so much trust in your eyes They make me remember blue skies and sunshine I wanna be what you see in me I wanna love you the way that you love meBaby, with the sweetest kiss You came along and stole my breath Tore down my defenses with a whisperOh, you show me how love can be You break through to my heart SoftlyI don't wanna be that strong If it means being alone I wanna stay with you where I belong And let you show me just how good love can be You break through to my heart Softly, baby, softly Softly, baby, softly
