

Fight Or Flight

Riddleâ„¢

We're ready to go Ticking like a bomb that's about to blow
It's taking control Pulling at your feet like an
undertow You don't really know
If you're all that capable But you've been told
Don't pretend you're stupid Figure it out
Sort it out Go make yourself useful
You're better than dead You really made a mess with the words you said
So easily fed
The flames of the fire rise above your head
They want to be led
You've joined the ranks instead
There's a voice in your head I can't figure it out
Any more than the generation
before me I can't figure it out
How we got where we are today I can't figure it out
Any more than the generation before me
I can't figure it out We've got to fight not to fade away
