Stranger

Trampled By Turtles

It's all i can do to walk out of here alive
After all the hall I'v been through
So im gettin out of this town for a while
To spend the rest of my nights and days wishing i was back here with you
And you can see it all washing away,
It's over right before it starts
After all i said all i wanted to say
I went through all the pieces, trying not to tear it apart

Corus: And I'm a stranger now
Aint no one eles around
Cant forget about the sound of your alibi
I know you've been here before

We already gave the world to you man.
How can you make us beg on our knees?
For you might be the end of us all.
I love so many people that up and said good bye.

(corus)

You can cut me once and then I'd bleed all night,
You still might make it back home alive

Just spread my name all over this town
You've already sold the angles, who are comeing back for more.

(Corus)
