## **Vampire Heart**

## **HIM**

You can't escape the wrath of my heart

Beating to your funeral song

All faith is lost for hell regained

In the dust of the wrath of shameLet me wake in the sun of my heart before

Lead you along this path in the dark

Where I belong until I feel your warmthHold me like you held onto life

When all fears came alive and entombed me

And love me like you loved the sun

Scorching the blood in my vampire heartI'll be the thorns in every wound You will send my hope

I am the nightmare waking you up

From the dream of the dream of loveLet me be indisposed as heaven's gates hold Gave you my soul, started to love

I'm waiting for your kisses to take me back homeHold me like you held onto life When all fears came alive and entombed me

And love me like you loved the sun

Scorching the blood in my vampire heartHold me like you held onto life When all fears came alive and entombed me

Love me like you loved the sun

Scorching the blood in my vampire heartHold me like you held onto life
When all fears came alive and entombed me, my vampire heart
Love me like you loved the sun
Scorching the blood in my vampire heart my vampire heart
