

Stars Come Out

Calvin Harris

Lying in the grass
Watching the stars come out Come and get the dream
Ghosts right through the cemetery
Feel the morning rain
Dancing 'round the Colosseum I can not explain
Something in your chemistry
Power to your brain
Power to the mind's museum Come and get the dream
Ghosts ride through the cemetery
Feel the morning rain
Dancing 'round the Colosseum I can not explain
Something in your chemistry
Power to your brain We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out Lying in the grass
Watching the stars come out Come and get the dream
Ghosts ride through the cemetery
Feel the morning rain
Dancing 'round the Colosseum I can not explain
Something in your chemistry
Power to your brain We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out We can watch the stars come out
Find out what we like about
Everyone without a doubt
We can watch the stars come out We can watch the stars come out
Find out what we like about
Everyone without a doubt

[illegible]
