

Prevail

Kreator

Death of emotions, birth of decay
Fight revolution grips the heart of men
Rising rebellion loosing control, pure mental terror
Reformation needed to be raised to
Future awareness, manipulation has failed
Rulers, leaders, anarchy will prevail now
Reinforced hate glowing pulsate
Society failed, new generation awakes
Mental slavery thought erasure cause for your condition
Mind murdering parasites forced into suicide
Material safety plastic savior basis of possession
Rulers participate, anarchist dominate
Infected by a virus, promise of a better day
Conception of a master plan, protectors of blind faith
Raised to new awareness individual way of life
A dated shit philosophy, youth runs amok
Moloch masters, democrats, diplomats desperation
Criminal energy part of the strategy
Focus distraction, pain infection, manipulation failed
Misleading disharmony, now only victory
Life becomes perfection when the spark has almost died
Decades of endless darkness now embraced by shining light
Autonomous power, finally this war is won
Golden days of anarchy, the new age has begun
Fear of the future, hope for the past
Hymns of enslavement forever laid to rest
Elders tomorrow, youth of today, choice for a changing
Better world needed to be arised to
Future awareness, manipulation has failed
Rulers, leaders, anarchy will prevail now
