Love Is Our Weapon

Never Shout Never

Hey everybody, take a look around
Put your money where your mouth is, take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that we're fightin' about
See, I never got involved with politics
'Cause they always brought out the worst in my folks
But I always swore to them if I could make a change at all
I'd love this world before it implodes
'Cause we all want change
And we want it now
Hey everybody, take a look around
Put your money where your mouth is, take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that we're fightin' about
Love is the weapon for this lukewarm congregation
And love is the only thing that's kept me believing
And love is the weapon for this wounded generation
Love is the only thing that's kept me believing
That the world will change
Yeah, we all want change
Hey everybody, take a look around
Put your money where your mouth is, take your eyes off the ground
We got a hard day coming if we can't work out
All the pissy little problems that we're fightin' about
