

As Always I Remain

Night Ranger

Here I am my heart in a sling
Holding on to memories wondering what might have been
There you are lost in a dream full of life
Yet loneliness has caused you to bleed I know where there's room enough for two
Take a trip to where we've been
The water's hushed underneath the bridge again As always I remain So where are we now
Life is just a daisy chain your innocence my lost refrain
And where are we now
Never said you'd stay the same as always I remain A sudden call it's the end of the line
Or is it just the start of something maybe we'll see
Where will you go and who will you be
Me I'll just be singing songs, crossing fingers
There's always something going on As always I remain, yeah
As always I remain, yeah So where are we now
Life is just a daisy chain your innocence my lost refrain
And where are we now
Never said you'd stay the same as always I remain I must admit I'm an untimely man
Appearing to calloused to all
There's a right way a wrong way
As always I will remain on this road right or wrong, yeah yeah So where are we now
Life is just a daisy chain your innocence my lost refrain
And where are we now
Never said you'd stay the same as always I remain As always I remain, oh
As always I remain
