After Dark

Shop Assistants

Underneath the naked light
You can see her tired eyes
They have seen too many shadows
She has heard too many lies

Each time that you go out on your own
I wonder if tonight you won't come home
Does it really have to be this way?

All the stars in heaven will cry for you
Heaven will cry for you

Nobody ever did you any favours
You never gave nobody any fun
You always say you've got to make a living
Don't you know that people like you go missing

Annie won't you please stay at home?

All the stars in heaven will cry for you
Heaven will cry for you
Heaven will cry for you
Heaven will cry for you whoa oh oh

Yeah you say you've seen it all before
Try to tell me nothing scares you any more

One day they're going to find you in the river
They're going to have to put you back together

All the stars in heaven will cry for you
Heaven will cry for you
Heaven will cry for you
Heaven will cry for you
