

High Octane Fuel

GBH

I've got a turbocharger, on my car,
without that power .. we wouldn't get far.
Let me take you back to when power first began,
rubbing sticks together can't be a lot of fun.
High octane fuel ..I've got fuel injection, on my Cadillac,
when I push that button, I ain't coming back.I've got a rocket booster, on my saloon.
If we waste power, we'll run out soon.I've got solar panels to keep me warm,
and a nuclear warhead, to fry you all.
