

# Redefinition

## Black Star

Ladies and Gentlemen  
It's time for me to present to you  
A redefinition of disco  
A new kind of go-go  
That will pump in your heart  
'Till the beat falls apart in the sunlight  
Oh, electropop  
And this tech and club  
Music is meant to be fun  
When the beats are slow  
Oh, they break my flow  
And all I can do is just run  
Because I'm telling you I know what to do  
(WE NEED A REVELATION)  
Then baby, baby, baby  
Here's my creation  
  
So let me present, now  
A redefinition of disco  
A new kind of go-go  
That will pump in your heart  
'Till the beat falls apart in the sunlight  
Mh, I need some sub  
And a vocal-dub  
Making it thick and fantastic  
'Cause there's nothing like  
When you really strike a beautiful note that will stay  
Yeah, it will stay with me and tickle my bra-i-ain  
(IT'S ALL A NEW SENSATION)  
Then baby, baby, baby  
I love this creation...  
So let me present, now  
A redefinition of disco...
