Help

Burning Heads

deep in your sleep, hits and screams take you out of your dreams
you stand up and walk to the window, open the panesand take a look outside
watch this guy, his mouth full of blood
hear the scream of a girl, both pursued by 4 assholes
it's just right now, just right now, it's just what's happening out there.
Scream, shout no, not agin
help, they need help.
what a situation man, there's no else around now. so what's on your mind
will you try to act... seems so scary.
it's a dark cold night one amongst the others
hear those sounds and don't start thinking
it's a dark cold night one amongst the others
hear those sounds as the dogs start barking
