

# When the Sun Burns Red

## Kreator

Savage heat is searing  
Global warming has begun  
Mother earth is reeling  
No protection from the sun  
Forest fires are raging  
While the rivers turn to ice  
Foolish man creating  
Mother nature's cruel demise

Hailstorms, tornadoes  
Cold spells, untimely frosts  
Heat waves and blizzards  
Global death's the cost

Face the end of time  
As we plunge headlong towards the day  
Can't deny the signs  
When the sun burns red  
The earth will turn  
From blue to gray

Winter turns to summer  
Then the seasons disappear  
No one needs a prophet  
To explain what's all too clear  
Oceans overflowing  
Islands drowning everywhere  
Leaders wouldn't admit it  
Now they're crying in despair

Hailstorms, tornadoes  
Cold spells, untimely frosts  
Heat waves and blizzards  
Global death's the cost

Face the end of time  
As we plunge headlong towards the day  
Can't deny the signs  
When the sun burns red  
The earth will turn

From blue to gray

Now rain shall wash away sad remains of man  
Cities once so proud will crumble in sand  
Buildings collapse when all is done and said  
The guilty ones will die with the innocent  
When the sun burns red
