What's At Stake

Slapshot

Stick the needle into your arm
Do anything that does you harm
I see you falling down on the floor
I see you staggering out the doorYou tried it and you liked it and you thought that
You could take it
Until you realized you couldn't escape it
How far you fall you don't know
Until you're at the bottom with a nose full of blow
You don't know what you're to me
To see you laying there so helplessly
Get yourself together, before it's too late
Or a life of pain will be your fateYou don't care about anyone
Just so long as you've had your fun
But not until you get your fix
And now you're taking a deep sixYou tried it and you liked it and you thought that
You could take it
Until you realized you couldn't escape it
How far you fall you don't know
Until you're at the bottom with a nose full of blow
You don't know what you're to me
To see you laying there so helplessly
Get yourself together, before it's too late
Or a life of pain will be your fateYou tried it and you liked it and you thought that
You could take it
Until you realized you couldn't escape it
How far you fall you don't know
Until you're at the bottom with a nose full of blow
You don't know what you're to me
To see you laying there so helplessly
Get yourself together, before it's too late
Or a life of pain will be your fateWhat's at stake
What's at stake
What's at stake
