Best Days

East 17

The best days I ever hadEarly in the morning
Walking from a restless night
I turn to see your body
Lying naked next to mine
The times we shared together
The good times and the bad
I thought they were forever
The best days I ever hadWe should be together
Though I shall endeavour
Don't you say we're on our ownPicking up the pieces
Make a brand new start
What's going on?
The pain inside my heart
You used to be so happy
Back in the good old days
I wish they were forever
The best days I ever had
We should be together
Though I shall endeavour
Don't you say we're on our own
