

# Best Days

## East 17

The best days I ever had  
Early in the morning  
Walking from a restless night  
I turn to see your body  
Lying naked next to mine  
The times we shared together  
The good times and the bad  
I thought they were forever  
The best days I ever had  
We should be together  
Though I shall endeavour  
Don't you say we're on our own  
Picking up the pieces  
Make a brand new start  
What's going on?  
The pain inside my heart  
You used to be so happy  
Back in the good old days  
I wish they were forever  
The best days I ever had  
We should be together  
Though I shall endeavour  
Don't you say we're on our own
