

Dynamite (feat. Christina Novelli)

[Gareth Emery](#)

Watching the sky light fall to black
Feeling like the lights never coming back, no
When it's dark and there's no one
I will be here, Ill be here And its all for you
Every spark in every flame
All for you
And all the stars they know your name Like a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite Like a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite Like a blazing light, ready to ignite
We are made of dynamite
Fireflies falling through the night
We are made of dynamite
Blazing light
Well show
Blazing light
Well show
