

Method of Groove

Life of Agony

Get up We've got the method of groove that grabbed your attention
Now that you're aware we're gonna give you the message
My, my father taught, my father taught me many things
I'm living deaf, dumb and blind will get you nothing So listen up and hear what I have to say
It's never too late to learn in this day and age
We'll point you in a new a direction
Passed down to this generation If you've learned anything from me
It would be hold on to your dreams
I learn from my mistakes
And it will take off some of the weight He said, "You got your whole life to live
And so much more to give"
I'll never compromise
And you will never live a lie
He said, "Son, remember where you came from" Fuck it We never doubted ourselves for a minute
Though they may criticize and compromise
But we were always in it
So come on down and see what this is all about
It's in our soul, on the road, wherever we may go So wake up, nothing can stop us
We got the chaos so just let us provide
The lines that make your mind spend the time
Think before you sink to the bottom If you've learned anything from me
It would be hold on to your dreams
I learn from my mistakes
And it will take off some of the weight He said, "You got your whole life to live
And so much more to give"
Oh I'll never compromise
And you will never live a lie
[Inaudible] He said, "Son, remember where you came from"
He said, "Son, remember where you came from"
