

Stagefright

Def Leppard

I said, welcome to my show
It's just a-you and me baby
We got the whole damn night to go You're holding out on me, while I'm on fire
If you can't stand the heat, then you should try
Victim of my vices, you know you are
You skate on ice to paradise, stairway to the stars Stage fright all night, won't you let go
All night stage fright, on with the show You come on like a lady dressed to kill
Never thought you could be caught, but you will
A little understanding, a little love
A headline act around the back, is what I'm thinkin' of Stage fright all night, won't you let go
All night stage fright, on with the show
Stage fright all night, you're dream starts today
All night stage fright, is only a heartbeat away You're going for my head, you're going down
Gettin' good at being bad, you're hangin' round
A fun inspired asylum, toys for the boys
Love on the rocks, forget-me-nots, you got no change Stage fright all night, won't you let go
All night stage fright, on with the show
Stage fright all night, you're dream starts today
All night stage fright, is only a heartbeat away Stage fright all night, won't you let go
All night stage fright, get on with the show
