

All the Way Up to Heaven

Guster

He said to only look up
He said to never look down
Down is where we came from
He said to hope for the best
And take a load off my chest
Soon I could be happy And go all the way
Up to heaven
And go all the way
Back home He thought I might need his help
No one gets high on themselves
I just seemed so lonely
He's just tryin' to be nice
And spread around his advice
I could be that happy And go all the way
Up to heaven
And go all the way
Back home Stay the way I am today
Is certain moment disaster
He can tell a fairy tale
It's happily ever after
Just relax and greener grass
Will grow here for a change
Maybe then we'll last a million years or more
And more and more and more And go all the way
Up to heaven
And go all the way
Back home Yes, I do believe what he says
I want to be happy
I could sure use his help
No one gets by on themselves
He can make me happy It's a warm summer breeze
It's a weakness in your knees
It's a perfect place above
Full of everlasting love Nothing to fear, nothing to hide
You just say what's on your mind
Needn't think before you speak
This is how it's meant to be Ever high never fall
You can do no wrong at all
In this heaven up above

Filled with everlasting love
To the light, to the light
