

Better Looking Brother

Lust for Youth

What is it for?
What do you see staring down at your feet?
Somewhere it snow, where do you go?
Where tenance are all you know
But what I have is what you need
And what you have is what I need ohSo whatever hurts, down bother
You are one man
Don't strive to be another; you are the better looking brother
So unlike each other
You are one man
Don't strive to be another; you are the better lookingNow it's time, now we'll know
Who know and who let go
It's gonna happen, but who's to say?
Prior to what you made
Anticipate while we waitYou have a part to play in here tonight
Do whatever is too cold
You have a part to play in here tonight
