Cold Day In Hell

Primal Fear

We're heading out to nowhere
Cruisin' on total speed
The only chance was
To exterminate the breedUp to the minute
We can lose this fight
Every day another mission
On our endless flightThe dreams became less
The night had us under its spell
We looked into our eyes
It was a cold day in hellAll or nothing
Till the lightning strikes again
All or nothing
It was a cold day in hellOn the horizon we saw smoke
Coming out of the blue
We saw the next level
It was too good to be trueStrange colors surrounded us
On our mission without hope
But we don't understand
We're walking the thin ropeAll or nothing
Till the lightning strikes again
All or nothing
It was a cold day in hell
