Today Is That Tomorrow

Charley Pride

You took her off so many times always had your way
The hurt she hid behind a smile had turned her face away
You always thought of someone else tomorrow was her day
But today is that tomorrow you thought of yesterday
Today is that tomorrow you always pushed aside
So sure you couldn't lose her blinded with your pride
Yesterday she loved you but what a price it was to pay
Just to put off till tomorrow what you should have done today
[fiddle]
It's so easy to remember now but it's too late
Something you said to her you could have said about her way
You knew then the time would come when you would have to pay
But today is that tomorrow you thought of yesterday
Today is that tomorrow...
Just to put off till tomorrow what you should have done today
