

Nowhere to Run

[Santana](#)

Night ain't a friend, its black and so still
It waits like a cat then moves for the kill
It casts no shadows, high on the wall
Its givin me no peace at all Now youre gone the pain goes on
Youre so deep into me, now Im begging to you, set me free I've got nowhere to run, nowhere to hide
No way to stop this hurt deep inside that you gave to me
Nowhere to run, nowhere to run, nowhere to run The sound of your voice, it comes in the night
It stays with me there until the light
And you say the words that you said before
When you said youd stay you walked out the door I can take the afternoon but then comes the night
Instead I walk the floor till the light I've got nowhere to run, nowhere to hide
No way to stop this hurt deep inside that you gave to me
Nowhere to run, nowhere to run, nowhere to run I've got nowhere to run, nowhere to hide
No way to stop this hurt deep inside that you gave to me
