Wanted Is Love

Phillip Phillips

Lonely in a room no sound to fill your soul Hopes and dreams, the house will glow who can't let go

But you can only see when I look into your eyes you pull me in too deepTake me in take me out till I'm nothing more than words spoken from your sweet sweet mouth

And dance around like no one can see baby

Move your body with the rhythm, move your body next to meWanted is love, now go and sing You know you gotta hold on to what you love before it's gone away

Wanted is love, now go and sing

You know you gotta hold on to what you love before it's gone awayOne step too, and I'm sinking in your lies
Only to see the truth hidden behind your evil eyes

And no likely me to the ways of you

Is it me or am I lone it's all such mysteryWanted is love, now go and sing

You know you gotta hold on to what you love before it's gone away

Wanted is love, now go and sing

You know you gotta hold on to what you love before it's gone awayWanted is loveWanted is love, now go and sing

You know you gotta seek everything you love before it's gone awayWanted is love, now go and sing You know you gotta seek everything you love before it's gone awayWanted is love

Wanted is love
