

# To Sirius

## GOJIRA

Now from a solar system  
To another I fly  
I come with life in my veins  
Through darkened space I ran  
I left a struggle behind  
And faced the fear that's alive  
I lost a world and traveled  
Straight across from the sky  
To find the gates of the heart I come to Sirius see  
To learn from you friends of old  
And wish to come into being  
And behold I'm with you  
I am ready now to go  
The distance and even beyond  
Recover all my forces  
All the strength of the world  
And feel the light into me  
From the strength of god  
We go to the power of goddess  
This place is a throne  
For brightness  
The age of war is over For god's sake  
The have never heard of you  
?You?ll never reach  
This master race?  
Our force sickening  
Killing all the time  
Human laws  
Already slayed many lives There was a streak of madness  
But now I know  
I see its not the only truth  
The scars in me are opened  
Won?t you please call me beyond Crave affection love and courage  
Being courageous  
And flying instead of  
Falling down  
Follow these instructions  
I've been given  
In this dream awake There is no goal to reach now

Leviathans  
No complaint it all  
Dolphins from upper space  
Are in front of me  
In present they dwell This is my way  
I've found my home  
My state of real  
There is no goal to reach  
This is my way
