Get With It

Over Proof Sound System

Spit fire wheels and diet cola Screw your party I'm skating home You don't make friends by chasing daydreams Like you don't make friends hanging out on your own I never thought of myself as complacent Always been the one who's moving on My friend started cutting herself 'cause it looked cool Now it won't be long no it won't be long try too hard to fit in with the crowd Get with it gotta get with it Get with it gotta get with it but you can't get with so you get left out Step back take a look at the big picture decided that I'm staying home that way nothing can go wrong to hide inside my social misfortune I never thought of myself as complacent Always been the one who's moving on I'll be gone I'll be gone If I screw up one more time I'll Get with it gotta get with it Get with it gotta get with it try too hard to fit in with the crowd but you can't get with so you get left out Fuck your party I'm skating home Spit fire wheels and diet cola You don't make friends by chasing daydreams I never thought of myself as complacent Always been the one who's moving on Like you don't make friends hanging out on your own Now it won't be long no it won't be long My friend started cutting herself 'cause it looked cool try too hard to fit in with the crowd Get with it gotta get with it Get with it gotta get with it but you can't get with so you get left out try too hard to fit in with the crowd Get with it gotta get with it Get with it gotta get with it but you can't get with so you get left out
