

No Name #6

Elliott Smith

You've got the wrong equation
Your figures fell so you make more up
All's false in celebration
If only you could just change your luck This time we can't lose
This time we can't lose You're pushing nine you're doing pretty
But you're playing with the sound turned down
We drive along between the cows and cotton
Saying with the stars all around This time we can't lose
This time we can't lose The moon is in a sickle shape
You know you're only really happy just for now
Looked at the city scape
Well, there's a planet that'll catch you and drag you back down This time we can't lose
This time we can't lose This time we can't lose
This time we can't lose Can't lose
Can't lose
