

# Everything I Want To Do

## Disaster in the Universe

Mood it's hard to get on  
Suspecting the outcome is the rich of us  
Let us just chew with our evilest tongues  
'Til the dinner is gone, and sleep the hours back  
Soon nobody is wrong  
Let's focus on letting go of all that's done  
I'm sending a research group to the wound  
I'll do it before the water's ankle deep  
Time blasts, controlling,  
hoping that everyone arrives on time  
So I just lean back, receiving,  
thinking of everything I want to do  
And it's like dreaming, what meaning?  
Dragging me back to the ocean, everything open  
Mind those evenings  
that are reminding me of the temperature  
Maybe I'll sit, revealing,  
easing off everything I want to do  
Soon in need of a pause  
Let's focus on I only got a few meters wrong  
From now on my errors will be seduced  
And I will see to the couch releasing me  
Bang, I'm touching the wood  
Discover that I just won't, can't be, understood  
So I'll just hunt 'til the dinner is down,  
'til the water gets warm  
Though I'm not built for this  
Time blasts, controlling,  
hoping that everyone arrives on time  
So I just lean back, receiving,  
thinking of everything I want to do  
And it's like dreaming, what meaning?  
Dragging me back to the ocean, everything open  
Mind, what evening?  
So it's reminding me of the temperature  
Maybe I'll sit receiving, easing now  
focus to what's in sight  
Oh, no I don't need anything  
but a pause and dream of  
Everything I want to do  
Dreaming, what meaning?  
Dragging me back to the ocean  
Everything open  
Mind, those evenings  
Dragging me back to the ocean  
Everything open
