

# That's the Way

## Gob

Don't need no anyone  
Don't need anybody talk to me  
About handling relationships  
It seems like everyoneIt seems like everybody  
I think I really doubt I'd use their advice  
And tips but that's the way I was falling  
And that's the way I was fallingAnd the way although it's just begun  
I've heard enough already  
I feel I'm all worn out only just begun  
This trip this phenomenonWhich happens naturally something you hear  
About more than just companionship  
I remember when it was breaking my heart even though  
Then I was falling apart, even though
