

Move Along (feat. Norah Jones)

The Candles

There's a clock on the wall
I feel it's hands on my shoulder
And the nighttime will fall
With the words that you told her
You are such a beautiful shining star
Your love is a vine
It grows upwards silently
But your heart isn't mine
It's afloat on an endless sea
Every sun is silver when it shines clear through
Everything that's happening to me and you
Headed to the future at such a pace
It's written in the future
It's written in the past
The answers to the questions
That everybody asks
Somewhere in the distance
I know we're headed fast
Slow down, hold on
It's just about time to move along
I long to believe
I'm down on my knees for you
Are we finally free
Is it not what we're meant to do
You are such a beautiful shining star
I will always follow you to where you are
Headed to the future at such a pace
It's written in the future
It's written in the past
The answers to the questions
That everybody asks
Somewhere in the distance
I know we're headed fast
Slow down, hold on
It's just about time to move along
