

# Blur

## Britney Spears

Turn the lights out  
This shit is way too fucking bright  
Wanna put my eyes out  
If you wanna mess with my eyesight  
Just let me get my head right  
Where the hell am I? Who are you?  
What'd we do last night? Hey, yeah, yeah  
Who are you?  
What'd we do last night? Hey, yeah, yeah Can't remember what I did last night  
Maybe I shouldn't have given in but I just couldn't fight  
Hope I didn't but I think I might've  
Everything, everything is still a blur Can't remember what I did last night  
Everything, everything is still a blur  
(Did last night)  
Can't remember what I did last night  
Everything, everything is still a blur What's your name, man?  
Can you come here, hand me all my things?  
I think I need an aspirin  
Better yet I need to get up out of here  
I gotta get my head right  
Where the hell am I? Who are you?  
What'd we do last night? Hey, yeah, yeah, yeah Can't remember what I did last night  
Maybe I shouldn't have given in but I just couldn't fight  
Hope I didn't but I think I might've  
Everything, everything is still a blur Can't remember what I did last night  
Everything, everything is still a blur  
(Did last night)  
Can't remember what I did last night  
Everything, everything is still a blur What happened last night?  
'Cause I don't, 'cause I don't remember it  
Oh, what happened? Can't remember what I did last night  
Maybe I shouldn't have given in but I just couldn't fight  
Hope I didn't but I think I might've  
Everything, everything is still a blur Can't remember what I did last night  
(Blur)  
Everything, everything is still a blur  
(Did last night)  
Can't remember what I did last night  
Everything, everything is still a blur
