Blur

Britney Spears

Turn the lights out
This shit is way too fucking bright
Wanna put my eyes out
If you wanna mess with my eyesight
Just let me get my head right
Where the hell am I?Who are you?
What'd we do last night? Hey, yeah, yeah
Who are you?

What'd we do last night? Hey, yeah, yeahCan't remember what I did last night Maybe I shouldn't have given in but I just couldn't fight

Hope I didn't but I think I might've

Everything, everything is still a blurCan't remember what I did last night

Everything, everything is still a blur

(Did last night)

Can't remember what I did last night

Everything, everything is still a blurWhat's your name, man?

Can you come here, hand me all my things?

I think I need an aspirin

Better yet I need to get up out of here

I gotta get my head right

Where the hell am I?Who are you?

What'd we do last night? Hey, yeah, yeah, yeahCan't remember what I did last night Maybe I shouldn't have given in but I just couldn't fight

Hope I didn't but I think I might've

Everything, everything is still a blurCan't remember what I did last night

Everything, everything is still a blur

(Did last night)

Can't remember what I did last night

Everything, everything is still a blurWhat happened last night?

'Cause I don't, 'cause I don't remember it

Oh, what happened?Can't remember what I did last night

Maybe I shouldn't have given in but I just couldn't fight

Hope I didn't but I think I might've

Everything, everything is still a blurCan't remember what I did last night (Blur)

Everything, everything is still a blur

(Did last night)

Can't remember what I did last night

Everything, everything is still a blur
