## **Immaculate**

## **Seal**

This I long feared

Of what might be

Fear though I'd scare

An ebonyIf all the world

Could see us now

They'd realize

That we could be immaculate

If all the world could see us nowI walked through day

What should I might fear

Word can't describe

This love I needBut now I testify

Before you now

No wasting time

No waiting thenIf all the world

Could see us now

They'd realize

That we could be immaculate

If all the world could see us now I don't wanna lose control when it comes to rains

I don't wanna be the one to never cease the day

I want you to come with me [Incomprehensible] break away

From the unnaturalIf all the world

Could see us now

They'd realize

That we could be immaculate

If all the world could see us now If all the world could see us now

If all the world could see us nowWe were living for the world

Living in a dream

If all the world could see us now
