

# Time On Earth

Robbie Williams

[Intro]

What's behind your eyes makes you a star[Verse 1]

I want to take my time on earth

And give it meaning

They say you get what you deserve

I know the feeling

Those dumb looks only get you so far

What's behind your eyes makes you a star[Chorus]

I'm gonna walk onto that stage like it's my destiny

Stand and tell the truth, make no apologies

If tomorrow I should die, these are my memories

I'm gonna take this simple life and make history[Verse 2]

I dream a fantasy and then achieve it

Repeat the greatest lie till they believe it

You and me, not gods, define us now

You come in screaming, leave in silence[Chorus]

Oh, I'm gonna walk onto that stage like it's my destiny

Stand and tell the truth, make no apologies

If tomorrow I should die, these are my memories

I'm gonna take this simple life and make history[Bridge]

Let's fly higher than the mocking birds

They won't touch us way up here

In the sole asylum of the universe

A man can disappear

Raise a glass to the dysfunctional

It's never ever too late

I fell like miracles are happening

If I could just get out the way[Verse 3]

I want to take my time on earth

And give it meaning

They say you get what you deserve

I know the feeling, feeling, feeling[Chorus 2]

You've gotta walk onto that stage like it's your destiny

Stand and tell the truth, make no apologies

If tomorrow you should die, these are your memories

You've gotta take this simple life and make history
