

Don't Ask Why

My Bloody Valentine

See all your sorrow
But be happy tomorrow
From the back of my mind
I was searching and I From the look in your face
I believe, it's not too late See where you are
When did we go that far
From the things that we said
I was wishing us dead Turn around to the fool
Who believed, don't ask why From the look in your face
I believe, it's not too late Pillow, pretend
That I do not defend
My own love in the back
Need no question to ask If you need to see
The real, don't ask me From the look in your face
I believe, it's not too late
