

# From Clouds

## Via Audio

You're more than just a dream  
Because I hear your voice when I'm awake  
You're more than just a voice,  
Because I've seen the sun light up your face.

More than just a memory  
You came out from the clouds of my dream  
Always something more to give me

The first thing that I heard  
My train departed never to return  
The new year rolling in  
The strangers in the dark had much to learn

More than just a memory  
You came out from the clouds of my dream  
Always something more to give me

Come out  
From the clouds  
(repeat)

A blinking of the eyes  
And 15 years of dreaming came and went  
Remembering those times,  
I can't recall a moment of regret

More than just a memory  
You came out from the clouds of my dream,  
Always something more to give me

Come out  
From the Clouds  
(repeat)
