

Beautiful Soul

[Mike Williams](#)

Sometimes I feel so tired
But today I feel so wired
I look through my crystal ball
All I see is that wall So many people are standing still
Drifting away they lost their will
I just want to shake them and give them ears
Wake up - stop living in fear You are, you are a human, you are a beautiful soul
You are one with Creation, come on, get up - lets go... Sometime I feel so cheated
But today I won't be defeated
I cut the chains and I break free
Open your eyes and you will see You are, you are a human, you are a beautiful soul
You are one with Creation, come on, get up - lets go... We are here to live and learn
Another life, another turn
Don't be afraid to shine
Don't be afraid to open your mind You are, you are a human, you are a beautiful soul
You are one with Creation, come on, get up - lets go... You are a beautiful soul
