Download The Destruction

Full Scale

I'll bless you with a smile
Just come to understand your place here
You're faceless, take shelter for a while
Underneath my wing of thorns and bile my child
It's all the same and you're back again
And you're hoping you've been here before
You're not to blame but you're back again
And you're coping just drop to the floor
And please download my destruction
Check you're screen like a little sponge
There's a good boy, thinking no more
Run along and cry to mother
Find a way to be understood
With a modem strapped to the door
Thinking was always underrated
And your square eyes don't look so bad in this light
The cancer only bothers you at night
Dying slowly never looked so appealing
Who needs scars when it's death you're cheating
You don't feel the time with curtains drawn
You fall in love with girls you never saw
Sitting in your filth don't feel so bad
It's nothing, nothing
Now you're home with your feet up
She's just a bore, better find a better boredom
Take a shine to the little ones
But it's money I need some more
And I'd kill my neighbor to smell it once
