

# Download The Destruction

## Full Scale

I'll bless you with a smile  
Just come to understand your place here  
You're faceless, take shelter for a while  
Underneath my wing of thorns and bile my child  
It's all the same and you're back again  
And you're hoping you've been here before  
You're not to blame but you're back again  
And you're coping just drop to the floor  
And please download my destruction  
Check you're screen like a little sponge  
There's a good boy, thinking no more  
Run along and cry to mother  
Find a way to be understood  
With a modem strapped to the door  
Thinking was always underrated  
And your square eyes don't look so bad in this light  
The cancer only bothers you at night  
Dying slowly never looked so appealing  
Who needs scars when it's death you're cheating  
You don't feel the time with curtains drawn  
You fall in love with girls you never saw  
Sitting in your filth don't feel so bad  
It's nothing, nothing  
Now you're home with your feet up  
She's just a bore, better find a better boredom  
Take a shine to the little ones  
But it's money I need some more  
And I'd kill my neighbor to smell it once
