Not So Different

Eva Avila

Somethin' 'bout you and me living life dangerously
I'm from here, you're from there but I don't even really care
My friends say I'm crazy, I'm just not your type
But love is many colors, it's not black or whiteWe're not so different, I want you and you want me
That's something what we agree, no different
You got plans, I understand
I'm following my own dream, no differentI get you and you get me
And that means that everything
Who's to say we gotta change?
Who's to say we're not the same?
We're not so different, we're not so differentWhen you vibe next to me, I wanna live fearlessly
You know things that I don't know, teach me how to let go
I'm not scared to find about your everything
The more I care to see the more I'm sure you're for meI'm gonna improvise
