

# Not Afraid

## Earshot

Don't leave me alone, I'm feeling so numb  
I need you to be here, I need you to call  
And everything's wrong, a beautiful shame  
And everything's ugly, hazy, and gray And doesn't it hurt? Trick and control you  
Deceive and destroy you  
Doesn't it hurt? Forget and move on  
I'm here and I'm strong  
I've got you to blame when it's finally done I'm not afraid  
Of these feelings here inside  
I'm sure someday, I'll let go of all this hate for you  
I'll let go of all this hate Does it make you feel inside  
What you've never felt before  
Does it promise you a life  
But that left you all alone And doesn't it hurt? Trick and control you  
Deceive and destroy you  
Doesn't it hurt? Forget and move on  
I'm here and I'm strong  
I've got you to blame when it's finally done I'm not afraid  
Of these feelings here inside  
I'm sure someday, I'll let go of all this hate for you  
I'll let go of all this hate Doesn't it hurt you  
Doesn't it feel sick  
Doesn't it hurt you  
Doesn't it feel sick  
And I'm on my way I'm not afraid  
Of these feelings here inside  
I'm sure someday, I'll let go of all this hate for you  
I'll let go of all this hate I won't come around no more  
I'll just let you go away  
I won't come around no more  
I lost my way Really lost my way  
So really lost my way  
So really lost my way
