Martin Sheen Or JFK

Yellowcard

Here it is, one more glass for
These broken hands goes down for you
I've fallen in, I sink then swallow
I never meant to see this throughI'm taking them all
Taking them all back for good
To a place where I know that I'm safeThen I can fall
Then I can fall where I should
In this bottle with all my mistakesAll the days since I've landed
I lost the way to find my truth
You float away and leave me stranded
What's left to say, I'll hurt for youI'm taking them all
Taking them all back for good
To a place where I know that I'm safeThen I can fall
Then I can fall where I should
In this bottle with all my mistakesI could sleep but when I wake here
You'd still be gone and you're my air
I could breathe if you would stay here
Another song so I could stareI could sleep but when I wake here
You'd still be gone and you're my air
I could breathe if you would've stay here
Another song, I could stayTaking them all
Taking them all back for good
To a place where I know that I'm safeThen I can fall
Then I can fall where I should
In this bottle with all my mistakesTaking them all
Taking them all back for good
To a place where I know that I'm safeThen I can fall
Then I can fall where I should
In this bottle with all my mistakes
