

# I Will Always Be Your Friend

George Duke

We loved each other for so long,  
Tell me what went wrong in our lives  
To cause us such unhappiness?  
I will never understand  
How life can make such demands  
On a love that started out so right between us...I will never love again, the way that i do now.  
I will always be your friend, your friend until the end.  
I will never love again, the way that i do now.  
I will always be your friend, in love until the end.Change, how could we change so much?  
Become so out of touch with what's real  
And let jealous pride control our wills.  
We tried so hard to understand  
we tried to make love last for a while.  
But deep inside we knew it was gone...I will never love again, the way that i do now.  
I will always be your friend, your friend until the end.  
I will never love again, the way that i do now.  
I will always be your friend, in love until the end.
