

# E-Mail

## Pet Shop Boys

Communications never been  
As easy as today  
And it would make me happy  
When you've gone so far away You'd send me an email that says, 'I love you'  
Send me an email that says, 'I love you' Now time and distance melt away  
No digital delay  
And some things can be written down  
But we're too shy to say "Send me an email that says, 'I love you'  
Send me an email that says, 'I love you'" There may be other  
Temptations in your life  
Don't want to add more  
Complications to your life By sending this email to say, 'I love you'  
Sending this email to say, 'I love you' Now there's a ghost within this house  
You're haunting me tonight  
I'm looking at some photographs  
And thinking that I might Jump on a plane and surprise you  
Where you are, do you want me there?  
I'm so insecure  
But one thing would make me sure If you send me an email, that says, 'I love you'  
Send me an email it says, 'I love you' Send me an email it says, 'I love you'
