Outer Space (feat. Matt Good)

Whitney Peyton

Deep voice:
3-2-1

Matt:
We can blast off. We gotta get away. Its time to pack it up and make a trip to outer space. Act like a satellite up in the milky way. We only know. We don't need nothing.

Whitney:
I'm out this world. Can't take no more. They tell us things and sell us drinks. We can't afford. If your bored then lets explore. Get interstellar. Got the spaceship in my front yard neighbors hella jealous. We don't need the media feeding us. Amongst the stars in the media. Trip to mercury via Expedia. It time to leave the earth. Fly up like helium. Way out on Saturn life. It's easier believe that your. Bills are nothing major. When your final destination is a constellation. Connect the dots. Lets all get faded. Flying through the galaxy up in the matrix. I'm just saying.

Deep voice:
3-2-1

Matt:
We can blast off. We gotta get away. Its time to pack it up and make a trip to outer space. I'm like a satellite up in the milky way. We only know. We don't need nothing.
We can blast off. We gotta get away. Its time to pack it up and make a trip to outer space. I'm like a satellite up in the milky way. We don't need nothing let's hurry up and leave today.

Whitney:
I'm so glad that we, can walk the moon to find gravity never going back to my reality. Cuz i'm whats happening on krypton. If you know like the way i'm living you can just get gone. Into the stratosphere. Hell yea get outta here. We only positive on pluto ain't no bashing here. It's only magic here. Nobody preaches hating outer space. Nobody set aside forgotten or feels outta place. That's real. I'm going super nova posted up on jupiter. Tell me if your coming over. I'll send a UFO. To bring you right here rocking up these air miles. Talking light years.

Deep voice:
3-2-1

Matt:
We can blast off. We gotta get away. Its time to pack it up and make a trip to outer space. I'm like a satellite up in the milky way. We don't need nothing. We don't need nothing.
We can blast off. We gotta get away. Its time to pack it up and make a trip to outer space. I'm like a satellite up in the milky way. We don't need nothing let's hurry up and leave today.
